- 05/2015

Web Hosting Administrator

Mondadori France, Paris, France

Web hosting infrastructure manager in charge of the design of Mondadori France's digital hosting platforms and their operation

- Management of high-audience websites such as Grazia.fr, Topsante.com, Closermag.fr
- Design and implementation of digital hosting architecture (web/stream/mobile)
- The administrator of six industrialized digital hosting platforms (Puppet / VMWare / Proxmox)
- Creation of the decentralized collaborative R&D platform (Puppet / IceScrum / Jira / GitBlit / Virtualbox)
- DNS manager (800 managed domains)
- Closermag.fr :1 276 571 unique visitors in 24h on Friday 10 January 2014 vs 150 000 views/day following the Hollande / Gayet scoop
- EZ Awards: Site of the Year Grazia.fr 2013

01/2010
- 06/2012

Production Manager Cloud AWS

Iscool Entertainment, Paris

In a small team of experts in cloud computing (AWS) and web services with very very high traffic and high performance I designed and implemented industrialization tools and associated policy to automate the deployment and administration of web hosting architecture capable of supporting several tens of millions of pages viewed each day

- Design, implementation, and administration of "Infrastructure as a Service" (IaaS)
- Industrialization solutions for the creation and management of self-scalable hosting platforms on the Amazon Cloud (AWS ec2)
- Creation of several platforms hosting the Social Network games of Iscool-Entertainment
- Creation and urbanization of Business intelligence flows between the games and the information system
- Use of LAMP, Percona Server, Redis, Memcached, Puppet, Capistrano, Pinba, Zabbix, and Murder technologies on a park of 300 cloud servers including 50TB of data
- Responsible for the production (system and network administration of the hosting platform) of the IsCool game in the Facebook ecosystem (17 million players, 40 million page views per day)

01/2007
- 01/2010

Web Hosting Administrator

Prisma Presse, Paris

- Design and implementation of customized hosting architecture
- Admin of five managed web hosting platforms (Nexen, Serveurs Express), one proprietary platform (OVH), one Content delivery network (NTT)
- Creation of the collaborative web development and virtual hosting platform Xen for the Internet IT department of Prisma Presse (architecture modeling, R&D, simple production hosting, integrated tools for project management, documentation, and communication).
- DNS Manager (1101 Administered domains)
- Manager and user of SVN, Gforge, EZ Publish from 3.6 to 4.0, SMB,

PHP4, PHP5, Mysql 5.0, Apache 1.3 and 2.0; Lighttpd, Squid 2.6, Varnish, Eaccelerator, Xcache, Xdebug & Apc ...

- Consolidation of the hosting infrastructure and cost reduction
- Responsible for hosting 25 websites with between 300,000 and 27 million page views per month (gala.fr, voici.fr, femmeactuelle.fr, programme-tv.net, capital.fr, geo.fr, femmes.com, ...)
- Creation of the collaborative web development and virtual hosting platform Xen for the Internet IT department of Prisma Presse (architecture modeling, R&D, simple production hosting, integrated tools for project management, documentation, and communication)
- Expert web hosting architecture referent
- Level 3 support for Linux expertise
- All the sites (Voici, Gala, etc ...) have survived the Breaking news "Death of Michael Jackson"
 - Monday 22/06/2009 with 1 397 524 page views
 - Friday 26/06/2009 with 1 623 589 page views

09/2006
- 12/2006

Linux Expert System Engineer

Institut Français du Pétrole, Rueil-Malmaison, France

- System administration of Linux servers in a heterogeneous, predominantly Unix environment (Irix, Solaris, Aix, RH8, RE3, RE4, Centos 3, Centos 4, Tao)
- Realization of master for the industrial deployment of scientific workstations (Yum, kickstart)
- Realization of RPM packages for customization and configuration of workstations
- Management of several Yum repositories to update the Linux park (400 workstations)
- Level 3 support for Linux expertise

10/2004
- 07/2006

System Administrator, Technical Project Manager

Valerian SA, Noisy le grand, France

- Design of the network architecture (4 sites, 7 firewalls, 6 VPN clients, 20 security zones)
- Responsible for the network security plan (VPN, firewall, service backup plan, data backups, surveillance, and monitoring)
- System administration on IBM BladeCenter in Gnu/Linux Debian environment
- System administration in gnu/Linux environment Red Hat and Debian, Aix, SCO Unix, Solaris
- Consulting in network architecture for clients (French Bank)
- Design of intranet and extranet (CRM, Monitoring of financial flows, Knowledge base)
- Use of: Webmin, Virtualmin Virtual Servers, Apache 1.3 & 2, Php, Webalizer, Postfix, Bind9, ssh, NFS, Nis, Samba, Perl, HPux, Aix, Spip, Spip_Agora, Wifi, Courier Imap ssl, OpenSSL, Squid, Calamaris (squid log analyser), Squidguard, Swatchlog, DHCP (ics), Gnugp, MySQL, NTP, SquirrelMail, Tcpcum, Ethereal, Nmap, Bluefish, Nvu, IPchain, IPTable, PHPMyAdmin, Linux disk quota system, Qpopper, Linux Raid software, Smokeping, BigBrother, OTRS, Logcheck, Linux LVM, AWstat, IlohaMail, Round cube Webmail, Dotclear, Syslogng, FAI (Fully Automatic Installation).

11/2001
- 11/2003

Support Manager Lycos hosting Europe

Lycos Europe, Paris, France

Lycos hosting Europe support manager, CRM support tools:

- Design of new tools, optimization, administration, and management of user support tools

- Information retrieval, monitoring, data enhancement
- Administration and management of the Akio EMS CRM application: workflow for processing user support emails (40,000 emails/month)
- Operational contact with the various European competence centers for the design of CRM tools
- Operational contact "CRM support tools" for Lycos Europe on French design services

Free web hosting Tripod / Multimania :

- Technical support and first-level service to the free hosting managers of the 8 countries
- Handling complaints from visitors and users
- Handling of legal queries
- Support for the use of the free Tripod / Multimania administration services
- Support on the follow-up of reported bugs
- Technical interface with the development team
- Administration and monitoring of free Tripod / Multimania support tools

Webcenter hosting :

- Second-level technical support for European Webcenter customers in relation to the provider in charge of the first level and the editors and hosting manager of each country
- Support for the use of services (user administration, invoicing, follow-up of special cases, internal arbitration on behalf of clients)
- Technical support (Follow-up and resolution of bugs, follow-up and feedback of customer remarks, ergonomics)
- Partner interface (Monitoring of partner activity in charge of level 1 support, contact with editors and hosting managers in each country support contact with technical partners)

Bandwidth control :

- Monitoring and control of the use of web hosting services by our free users or Webcenter customers in Europe
- Fight against piracy and copyright infringement and repression of service abuse
- Monitoring traffic and combating overuse of bandwidth
- Monitoring account creation and disk space usage

11/1999
- 11/2001

User Support Manager

Multimania.fr, Paris, France

- Technical support and assistance :
- Technical assistance in the use of the services offered by Multimania
- Help and support for web creation and administration: HTML, DHTML, php mysql, RealNetworks, flash, firework, Dreamweaver, Webexpert, ftp, etc.
- Community management, creation of synergies: Opmania volunteer chat operators, Betamania beta tester
- Administration of member accounts
- Application of the policy and French law
- Monitoring of member content
- Relation and follow-up of contacts with legal authorities
